

# Handles and Hinges

Reynaers  
Aluminium

Windows.  
Doors.  
Curtain Walls.

When choosing windows and doors, a lot of attention goes into the design and the degree of insulation of the profiles. But it is equally important to choose the right handles and hinges, as these elements add an extra dimension to the windows and doors and enhance the personal character of your building.

In this overview, you can get acquainted with the wide range of possibilities of handles that Reynaers Aluminium offers. We only partner with dedicated suppliers who can offer high quality in tested and guaranteed products, so that you can have peace of mind.

You have the freedom to choose the finish of your windows and doors in almost all cases. It allows you to choose exactly the same, make a subtle match, or even a bold contrast with the element on which it will be installed. Read further and make your own decision...

# Handles

Handles are the subtle touch that bring consistency in the design of your project. Reynaers Aluminium offers a range of handles such as Contour, Touch, Horizon & Purity which spans most of our windows and doors portfolio. That design consistency is also reflected in the broad offer of colours and finishes, with a wide variety of painted and anodised options to easily match your profiles. Next to that, you can also choose for a stainless steel option with our Contour family.

Subtle details, with a noticeable difference

## Modern safety

Contour is our new range of robust stainless steel handles in a fresh and modern design to meet even the strongest durability and safety demands. Contour is compatible with most systems and opening types such as SlimLine 38, MasterLine 8 and 10, ConceptPatio 130 and ConceptPatio 155 and MasterPatio.

# Touch

## Timeless and versatile

Style and quality are combined in Touch, our trendsetting range of design hardware. Touch is sleek, elegant and slim hardware, suitable for windows, doors, sliding and folding doors. It is even suitable for use on wooden interior doors.

The sleek design fits perfectly into modern homes, but also provides a stylish contrast in renovations. Touch is available in all RAL colours, textured and anodised. A handle in the same colour as the frame of the window or door is also possible.

# Horizon

## Contemporary renovation

Looking for new horizons, that's the ultimate goal of just about everyone who goes building or renovating. The Horizon handles merge, almost invisibly, into a window. Because of this, they fit perfectly with all possible architectural styles.

# Purity

ConceptPatio 155  
Sliding door

## Exclusive and elegant design

For people who desire the ultimate design, a unique Reynaers Aluminium handle series is created, called Purity. This series combines next-generation material and mechanical properties with the superior Italian design abilities of designer Leo De Carlo. Purity is innovative and distinctive in terms of material, design and installation. The Purity range is suited for all our windows, doors, sliding doors and lift-and-slide doors.

# Olimpo

## Affordable design

The Olimpo combines a distinct look with affordability. The smooth lines are available in lockable and standard variants and with multiple can be enhanced by the many finishes available which contribute to meet the highest quality and aesthetical requirements.

# DoorPulls

A door pull can make the difference for your entrance doors. It plays a crucial part in the first impression you have before entering the building. You can select from a wide range of door pulls in many design variations, making it easy to find the one that best fits the character of your project. Short or long, thick or thin, round or square, you have it in every imaginable finish. You can even integrate complementary products, like a fingerprint scanner. The only thing left, is to make your choice.

# Hinges

While hinges are a crucial component that determine the functionality and comfort level of the building, they also greatly impact its aesthetics. The choice between visible and invisible hinges is obviously affecting the look of the joinery itself, but the selected hinge will also determine the maximum size and weight of the movable part of the window or door, which has an impact on the look of the building as a whole.

# Hidden hinges

## Invisible quality

Given the trend of minimalism and clean lines in architecture, it is no wonder the aesthetics in system design follow these principles. When you want a system to have these qualities, it is obvious the details will make the difference. Technology has improved. In some cases reaching the same level as visible hinges.

If hardware, like hinges, is hidden inside the system's profiles, it offers a variety of benefits, both functional and visual. The visual aspect is perhaps the most apparent: no disturbance of system lines and surfaces and consistent design by coupling it with other hidden or reduced hardware (motorization, electric locks, built-in sensors, ...). However, the functional benefits might be even more important: better air and water resistance - as gaskets can remain intact, and easy cleaning.

# Visible hinges

## Reliable and robust

From a classic rectangular shape to a slim cylinder shape, visible hinges come in all flavours, but our visible hinges have something in common: they are robust, qualitative and performant. Their designs have been perfected throughout the years, based on our and our suppliers' experience and know-how, and can reach hundreds of thousands of opening cycles with ease. Their reliability and robustness also make them perfect to combine with panic hardware, used in high traffic areas.

# About us

Our goal is to increase the value of buildings and to enhance the living and working environment of people worldwide.

As a part of the Reynaers Group, Reynaers Aluminium is a leading specialist in the development, distribution and commercialization of innovative and sustainable aluminium architectural solutions. These include a wide variety of window and door systems, curtain walls, sliding systems, and conservatories.

Besides the extensive range of standard solutions, we also develop customized solutions, tailored to the individual customer or project.

Reynaers Aluminium has been founded in 1965, is currently employing over 2400 workers in more than 40 countries worldwide and exporting to more than 70 countries on 5 continents. Reynaers Group achieved an annual turnover of over 555 million euros in 2020.

Our company's success is strengthened by our close partnership with 5,000 partner fabricators, architects, and project developers worldwide. This unique cooperation reflects in our motto: Together for Better.

At Reynaers Campus, we focus on sharing knowledge and experience with architects, fabricators, contractors and other building partners while inspiring with new technologies. Next to the Technology, Training and Automation Centre, Reynaers Campus also has its own Experience Centre where future buildings can be explored in our virtual reality room Avalon.
